

UX Design Storyboard

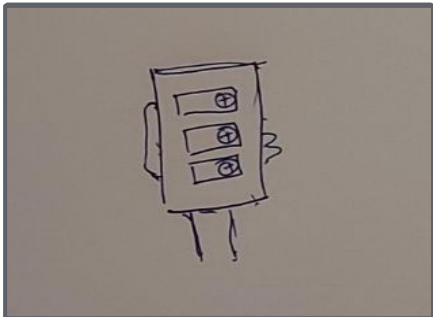

Scenario: An App to help users order snack in movie theaters without waiting in line - big picture

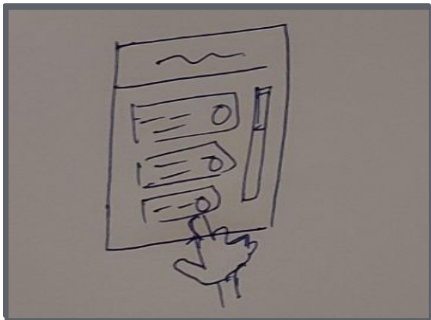

Aishwarya is sad after seeing so many people queuing for food in the movie theater

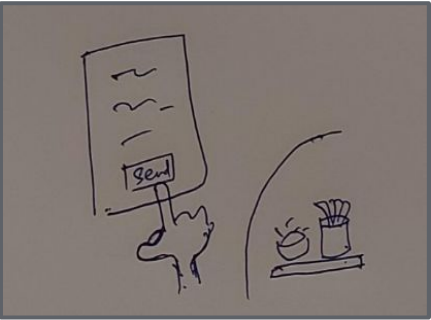

Aishwarya thinks of using the app which can help her order food in the movie theater

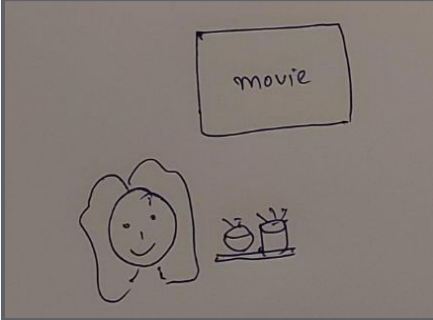

Aishwarya thinks of using our app to order snack

Aishwarya searches for restaurants and food and adds them in the cart

Aishwarya sends the order and the food is being prepared

Aishwarya gets the order at her seat and is happy because she doesn't have to miss the scenes.
